Soumeng Chea

cheasoumeng@gmail.com | Waltham, MA | 978-995-9219 | LinkedIn | Portfolio | GitHub

UX researcher and systems-oriented design practitioner pursuing an MBA and MS in Human Factors in Information Design at Bentley University with experience supporting AI-assisted workflows, usability evaluation, workflow optimization, and operational systems redesign across healthcare, academic, and technical environments. Background in Computer Science from Northeastern University with hands-on experience in Figma, SQL, Python, dashboarding, and behavioral analysis. Skilled in translating complex operational workflows and user insights into structured UX recommendations, interaction improvements, and scalable system experiences through cross-functional collaboration and iterative problem solving. Interested in designing intuitive interfaces for AI-enabled and operationally complex systems.

EXPERIENCE

Massachusetts Department of Public Health (DPH) | Boston, Massachusetts (Remote)
Student Intern, Division for Family Health Data & Analytics *February 2026 – June 2026*

- Designed REDCap workflow systems across multiple public health programs, improving intake coordination and operational tracking visibility
- Translated stakeholder requirements into structured workflows and interaction logic, supporting cross-functional execution and governance alignment
- Analyzed dashboard trends and workflow bottlenecks, informing iterative process improvements and usability-focused operational refinements

Bentley University | Waltham, Massachusetts (Hybrid)
Digital Content & Analytics Intern, University Communication Advancement *August 2025 – May 2026*

- Evaluated campaign and product performance using Excel and Power BI, identifying engagement trends across multiple initiatives
- Integrated behavioral analytics with qualitative feedback, diagnosing usability friction and supporting stakeholder decision-making
- Standardized reporting structures and documentation workflows, improving coordination and reducing ambiguity across teams

Bentley University – Department of Accounting | Waltham, Massachusetts (Remote)
Accounting Research Assistant, Professor Christine Liu *November 2025 – February 2026*

- Engineered GitHub API pipeline processing 3M+ records, enabling scalable research analysis and operational data workflows
- Designed multi-stage dataset matching framework, improving consistency and reliability across linked research systems
- Structured reproducible workflows and analysis-ready datasets, accelerating validation cycles and downstream operational analysis

Dawn Café | Phnom Penh, Cambodia (Remote)
UX Consultant (Contracted) *February 2023 – July 2023*

- Investigated onboarding workflows through structured user interviews, uncovering 8 usability pain points impacting customer experience
- Mapped 3 user journeys and synthesized qualitative findings into prioritized operational and interaction recommendations
- Presented UX research documentation and workflow analyses, aligning stakeholders on implementation direction and service improvements

SELECTED PROJECTS

Co-Project Lead | Healthcare AI Comprehension & Trust Study (Confidential Client) *January 2026 – May 2026*

- Directed end-to-end usability evaluation across 5 moderated sessions, assessing comprehension, trust, and workflow integration readiness
- Validated measurable improvements in diagnosis understanding (+4.4 points) and post-use trust ratings with 80% of participants scoring 7/7
- Synthesized behavioral friction patterns into UX recommendations, proposing AI-generated summaries and streamlined workflow interactions

Graduate Consultant | Welch's AI Adoption Insights (Bentley University) *September 2025 – December 2025*

- Conducted 12 stakeholder interviews across 3 departments, diagnosing workflow barriers impacting AI adoption and operational integration
- Synthesized qualitative and quantitative findings into structured insight frameworks, clarifying adoption patterns across user groups
- Designed executive presentation materials communicating phased AI rollout recommendations for 200+ employees

TECHNICAL SKILLS

Research, Analytics & Experimentation: Mixed-Methods Research, Usability Testing, User Research, A/B Testing, KPI Tracking, Dashboard Development, Workflow Analysis, Data Visualization
Programming & Technical Systems: Python, SQL, JavaScript, TypeScript, HTML, CSS, Node.js, Express.js, Git, GitHub
AI & Research Tools: Claude AI, ChatGPT, DeepSeek
Design & Collaboration: Figma, Miro, Microsoft Project, Jira, Confluence, Notion, REDCap, Qualtrics
Analytics Platforms: Google Analytics, Tableau, Power BI, Excel

EDUCATION

Bentley University McCallum Graduate School of Business, Waltham, MA
MBA & MS in Human Factors in Information Design | GPA: 3.50 *January 2025 – Expected December 2026*

Northeastern University–Khoury College of Computer Science, Boston, MA
MS in Computer Science, Focus: Data Science, ML, Human-Centered AI *September 2019 – August 2022*

University of Massachusetts Lowell, Lowell, MA
BA in Political Science, Minor in French *September 2015 – February 2019*
